

Students centered approach for advanced and slow learners

Our Institutions well augmented by the autonomous system, believes in student centered approach. As more than 90% of the students are from nearby villages, we try to instill confidence in them by making seminars and assignments necessary components of CIA. After the first CIA the students belonging to slow learners' category are identified and assignments, class tests are conducted to improve their status. Similarly, for advanced learners special classes are conducted to train them properly for competitive examinations.

Remedial classes from State Govt. funds are also conducted for MBC, SC&ST students, which will help the slow learners to raise their structure. Special tours and Industrial visits are offered to the students of various departments as they get exposed to new environments and develop their knowledge also.

Besides these all the departments have Association functions in which experts are called upon to give special lectures which will equip them to current trends.

Special programmes for advanced learners:

- 1. Online_quizzes_conferences-Webinars**
- 2. Science_Academic_Workshop**
- 3. Proficiency_prizes**

Special programmes for slow learners:

- 1. Orientation Programme**
- 2. Remedial_classes**
- 3. Self_learning_materials**
